Executive Directive #3:
Make raw data available in easy-to-find
accessible formats, in order to:

- Empower Angelenos to participate in governance
- Promote innovation among entrepreneurs and business
- Leverage one of government's greatest assets: public information
- Foster creative thinking about solving tough challenges

#dataLA

OPEN DATA

We publish and maintain up-to-date quality city data that can be used by City staff, the public, and private partners.

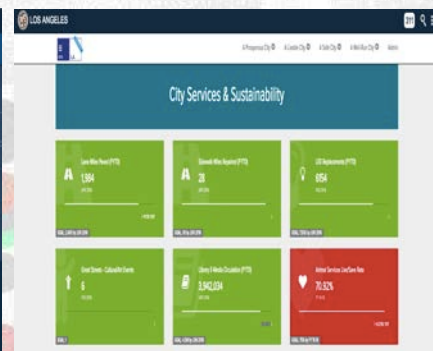

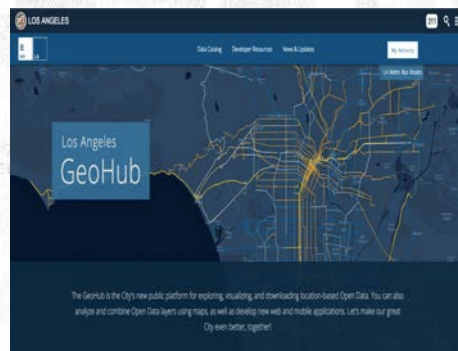

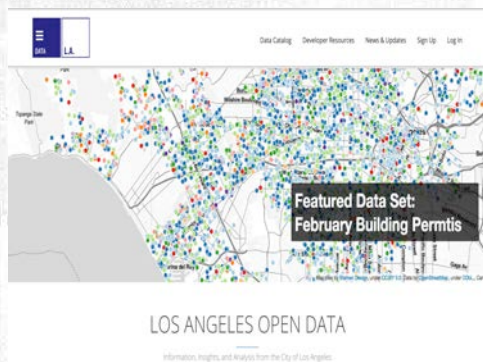

ANALYTICS

We use best-in-class analytics to tackle mayoral priorities and advance citywide capabilities in data analytics.

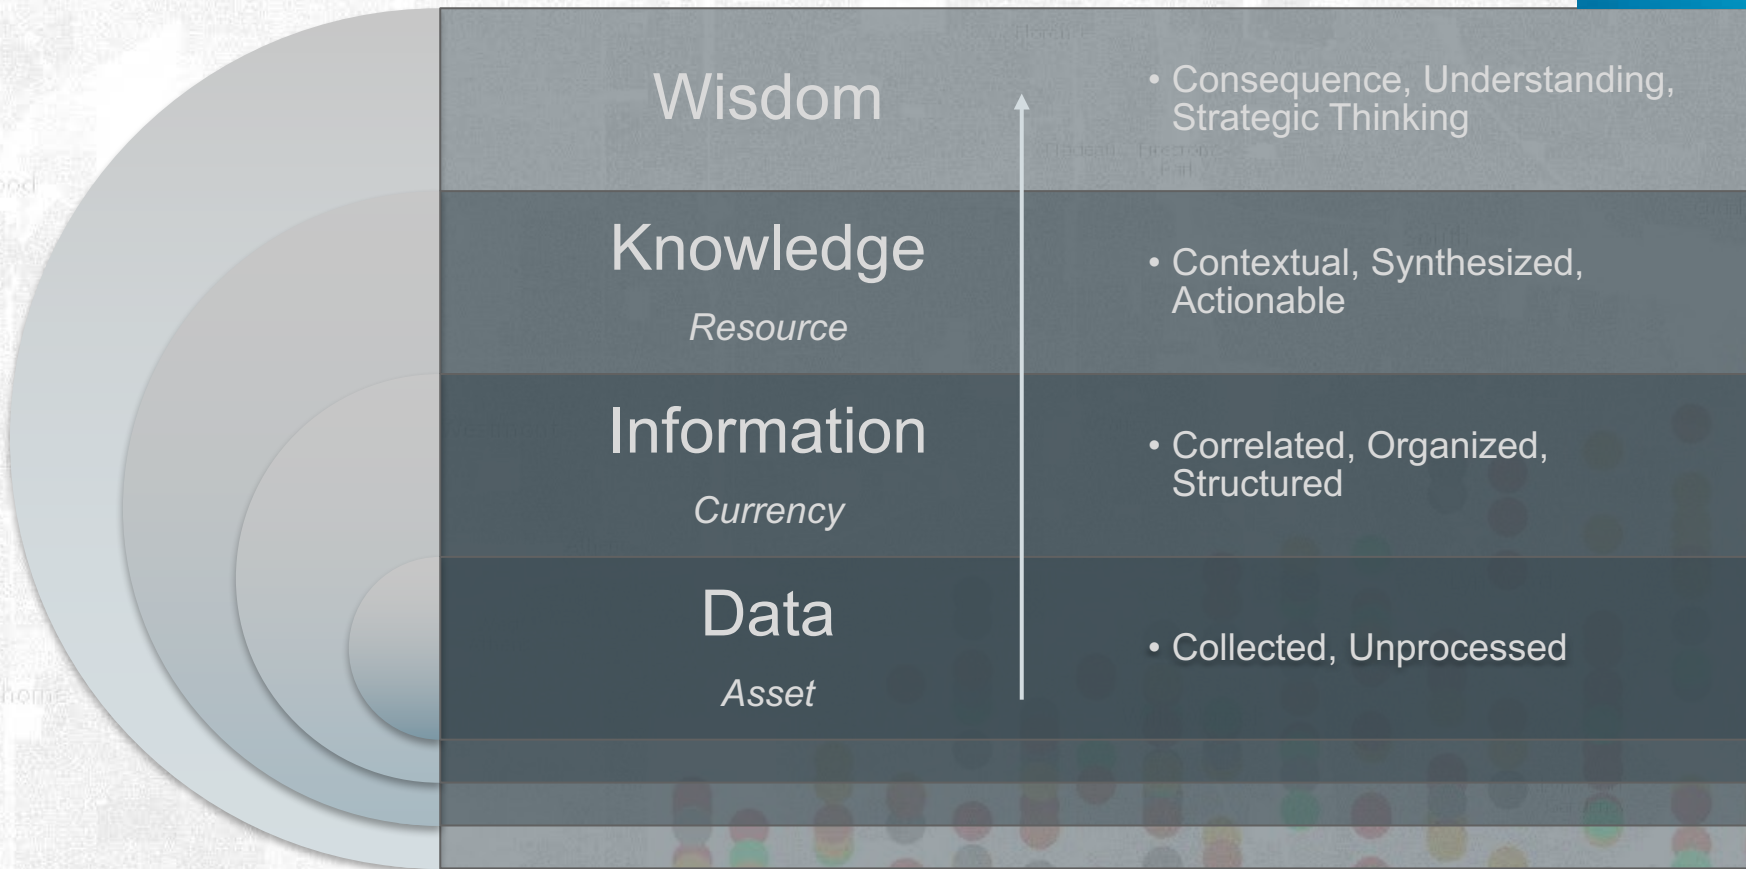

DIGITAL SERVICES

We advance user-centered design in development of all City digital services.

Data-driven Organizations

IDEA > EXECUTION

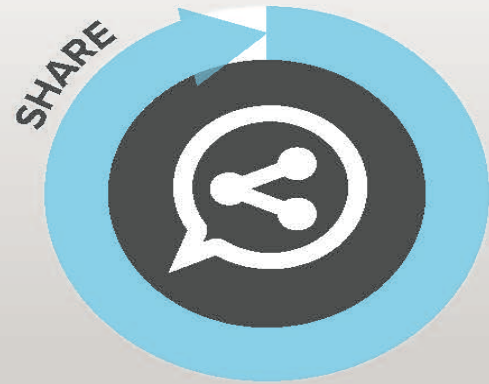

EMPOWERING COMMUNITIES THROUGH OPEN DATA

A Los Angeles community identifies a concrete, local need, challenge, or goal that can be addressed by harnessing open data.

DataLA provides support in accessing, visualizing, and analyzing data. The community creates a visualization, analysis, or resource to address the identified issue.

The community shares data insights and process. DataLA shares out this work to foster awareness so others can replicate, iterate, or ideate.
